

FISHERBRAND™ STERILE POLYSTYRENE DISPOSABLE SEROLOGICAL PIPETS WITH MAGNIFIER STRIPE - 100 ML

Fisherbrand™ Sterile Polystyrene Disposable Serological Pipets with Magnifier Stripe – 100 mL

The high-contrast black markings make the volumes easier to read, for improved optical clarity. Manufactured with optically clear polystyrene for accurate measurement. Fisherbrand™ Sterile Polystyrene Disposable Serological Pipets with Magnifier Stripe reduce reading errors and are designed for tissue culture work.

Inner bags are recyclable LDPE; outer boxes also are recyclable. Individually wrapped pipets are ideal for small-volume use requiring sterility and are available in either a clear, durable all-plastic wrap, or a color-coded paper/plastic wrap for reduced static cling.
