

HUMAN AGTR1 FULL LENGTH PROTEIN

目录: 11079

产品名称: Human AGTR1 Full Length Protein

规格: 10 µg, 50 µg and 100 µg

基因符号: AG2S; AGTRIB; AT1; AT1AR; AT1B; AT1BR; AT1R; AT2R1; HAT1R

Target: AGTR1

UNIPROT ID: P30556

描述: Human AGTR1 full length protein-synthetic nanodisc

背景: Angiotensin II is a potent vasopressor hormone and a primary regulator of aldosterone secretion. It is an important effector controlling blood pressure and volume in the cardiovascular system. It acts through at least two types of receptors. This gene encodes the type 1 receptor which is thought to mediate the major cardiovascular effects of angiotensin II. This gene may play a role in the generation of reperfusion arrhythmias following restoration of blood flow to ischemic or infarcted myocardium. It was previously thought that a related gene, denoted as AGTRIB, existed; however, it is now believed that there is only one type 1 receptor gene in humans. Alternative splicing of this gene results in multiple transcript variants. [provided by RefSeq, Aug 2020]

Species/Host: HEK293

Molecular Weight: The human full length AGTR1 protein has a MW of 40.9 kDa

Formulation & Reconstitution: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization.

储存和运输: Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
