

ADAMTS16 RABBIT PAB

Cat.#: S220268

Product Name: Anti-ADAMTS16 Rabbit Polyclonal Antibody

Synonyms: ADAMTS16s

UNIPROT ID: Q8TE57 (Gene Accession - NP_620687)

Background: This gene encodes a member of the ADAMTS (a disintegrin and metalloproteinase with thrombospondin motifs) protein family. ADAMTS family members share several distinct protein modules, including a propeptide region, a metalloproteinase domain, a disintegrin-like domain, and a thrombospondin type 1 (TS) motif. Individual members of this family differ in the number of C-terminal TS motifs, and some have unique C-terminal domains. The encoded preproprotein is proteolytically processed to generate the mature protein, which may inhibit chondrosarcoma cell proliferation and migration. This gene may regulate blood pressure.
