

ATP7B RABBIT PAB

Cat.#: S221179

Product Name: Anti-ATP7B Rabbit Polyclonal Antibody

Synonyms: WD; PWD; WCI; WND

UNIPROT ID: P35670 (Gene Accession - NP_000044)

Background: This gene is a member of the P-type cation transport ATPase family and encodes a protein with several membrane-spanning domains, an ATPase consensus sequence, a hinge domain, a phosphorylation site, and at least 2 putative copper-binding sites. This protein functions as a monomer, exporting copper out of the cells, such as the efflux of hepatic copper into the bile. Alternate transcriptional splice variants, encoding different isoforms with distinct cellular localizations, have been characterized. Mutations in this gene have been associated with Wilson disease (WD).

Immunogen: Synthetic peptide of human ATP7B

Applications: ELISA, IHC

Recommended Dilutions: IHC: 25-100; ELISA: 2000-5000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

Isotype: Immunogen-specific rabbit IgG

Purification: Antigen affinity purification

Species Reactivity: Human, Mouse, Rat

Constituents: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

Research Areas: Metabolism

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human liver cancer tissue using 221179 (ATP7B Antibody) at a dilution of 1/20 (Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human liver cancer tissue is first treated with the synthetic peptide and then with 221179 (Anti-ATP7B Antibody) at dilution 1/20.

The image on the left is immunohistochemistry of paraffin-embedded Human esophagus cancer tissue using 221179 (Anti-ATP7B Antibody) at a dilution of 1/20.

In comparison with the IHC on the left, the same paraffin-embedded Human esophagus cancer tissue is first treated with synthetic peptide and then with D262666 (Anti-ATP7B Antibody) at dilution 1/20.
