

ENOSF1 RABBIT PAB

Cat.#: S221956

Product Name: Anti-ENOSF1 Rabbit Polyclonal Antibody

Synonyms: RTS; TYMSAS

UNIPROT ID: Q7L5Y1 (Gene Accession - NP_059982)

Background: This gene was originally identified as a naturally occurring antisense transcript to the human thymidylate synthase gene. Alternate splice variants have been described, one of which (named rTSalpha) represents an alternate 3'UTR that is complementary to the 3'UTR and terminal intron of the thymidylate synthase (TS) RNA and down-regulates TS expression. Other transcript variants (rTSbeta and rTSgamma) do not overlap the TS locus. The function of this gene appears to be primarily to regulate expression of the TS locus both via the antisense transcript as well as through the encoded proteins.

Immunogen: Synthetic peptide of human ENOSF1

Applications: ELISA, IHC

Recommended Dilutions: IHC: 30-150; ELISA: 5000-10000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

Isotype: Immunogen-specific rabbit IgG

Purification: Antigen affinity purification

Species Reactivity: Human

Constituents: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

Research Areas: Metabolism, Cancer

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human liver cancer tissue using 221956(ENOSF1 Antibody) at a dilution of 1/20(Cytoplasm or Nucleus).

In comparison with the IHC on the left, the same paraffin-embedded Human liver cancer tissue is first treated with the synthetic peptide and then with 221956(Anti-ENOSF1 Antibody) at dilution 1/20.

The image on the left is immunohistochemistry of paraffin-embedded Human esophagus cancer tissue using 221956(Anti-ENOSF1 Antibody) at a dilution of 1/20.

In comparison with the IHC on the left, the same paraffin-embedded Human esophagus cancer tissue is first treated with synthetic peptide and then with D263788(Anti-ENOSF1 Antibody) at dilution 1/20.
