

ERN2 RABBIT PAB

Cat.#: S220530

Product Name: Anti-ERN2 Rabbit Polyclonal Antibody

Synonyms: IRE1b; IRE1-BETA

UNIPROT ID: Q76MJ5 (Gene Accession - NP_150296)

Background: The accumulation of unfolded proteins within the endoplasmic reticulum (ER) of yeast and mammalian cells activates the unfolded protein response (UPR) pathway and leads to the transcription of ER-specific genes involved in protein folding. The activation of the UPR requires the ER transmembrane kinase IRE1p (for inositol-requiring and ER-to-nucleus signaling protein). IRE1 α and IRE1 β are two mammalian homologs of the yeast IRE1p. These related proteins localize to the ER lumen and contain both a short transmembrane domain that spans the ER membrane and a cytosolic Ser/Thr kinase domain. IRE1 activation involves the oligomerization and trans-phosphorylation of the cytosolic portion of the proteins, which then potentiates its intrinsic kinase activity and, in turn, stimulates transcription of UPR-targeted genes.

Immunogen: Synthetic peptide of human ERN2

Applications: ELISA, IHC

Recommended Dilutions: IHC: 50–200; ELISA: 2000–5000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

Isotype: Immunogen-specific rabbit IgG

Purification: Antigen affinity purification

Species Reactivity: Human

Constituents: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

Research Areas: Cancer

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human liver cancer tissue using 220530(ERN2 Antibody) at a dilution of 1/40(Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human liver cancer tissue is first treated with the synthetic peptide and then with 220530(Anti-ERN2 Antibody) at dilution 1/40.

The image on the left is immunohistochemistry of paraffin-embedded Human gastric cancer tissue using 220530(Anti-ERN2 Antibody) at a dilution of 1/40.

In comparison with the IHC on the left, the same paraffin-embedded Human gastric cancer tissue is first treated with synthetic peptide and then with D261658(Anti-ERN2 Antibody) at dilution 1/40.
