

Product Description

Pioneering GTPase and Oncogene Product Development since 2010

GRSF1 RABBIT PAB

Cat.#: S215924

Product Name: Anti-GRSF1 Rabbit Polyclonal Antibody

Synonyms:

UNIPROT ID: Q12849 (Gene Accession - NP_002083)

Background: The protein encoded by this gene is a cellular protein that binds RNAs containing the G-rich element. The protein is localized in the cytoplasm, and has been shown to stimulate translation of viral mRNAs in vitro. Multiple transcript variants encoding different isoforms have

been found for this gene.

Immunogen: Synthetic peptide of human GRSF1

Applications: ELISA, IHC

Recommended Dilutions: IHC: 40-200; ELISA: 5000-10000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

Isotype: Immunogen-specific rabbit IgG **Purification:** Antigen affinity purification Species Reactivity: Human, Mouse

Constituents: PBS (without Mg2+ and Ca2+), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40%

glycerol

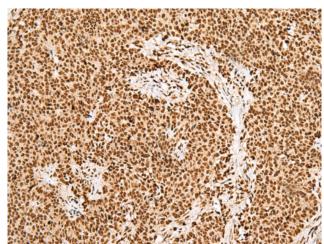

Research Areas: Epigenetics and Nuclear Signaling

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

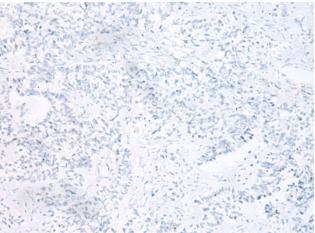

Product Description

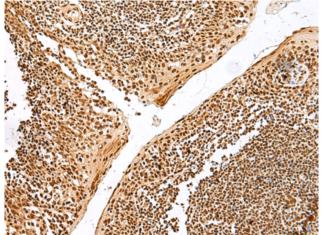

Pioneering GTPase and Oncogene Product Development since 2010

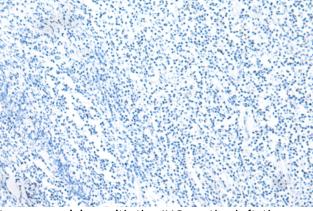

Immunohistochemistry analysis of paraffin embedded Human ovarian cancer tissue using 215924(GRSFI Antibody) at a dilution of 1/30(Cytoplasm and Nucleus).

In comparision with the IHC on the left, the same paraffin-embedded Human ovarian cancer tissue is first treated with the synthetic peptide and then with 215924(Anti-GRSFI Antibody) at dilution 1/30.

The image on the left is immunohistochemistry of paraffinembedded Human tonsil tissue using 215924(Anti-GRSFI Antibody) at a dilution of 1/30.

In comparision with the IHC on the left, the same paraffin-embedded Human tonsil tissue is first treated with synthetic peptide and then with D164133(Anti-GRSF1 Antibody) at dilution 1/30.
