

## NFS1 RABBIT PAB

**Cat.#:** S219241

**Product Name:** Anti-NFS1 Rabbit Polyclonal Antibody

**Synonyms:** IscS; NIFS; HUSSY-08

**UNIPROT ID:** Q9Y697 (Gene Accession - BC018471 )

**Background:** Iron-sulfur clusters are required for the function of many cellular enzymes. The proteins encoded by this gene supply inorganic sulfur to these clusters by removing the sulfur from cysteine, creating alanine in the process. This gene uses alternate in-frame translation initiation sites to generate mitochondrial forms and cytoplasmic/nuclear forms. Selection of the alternative initiation sites is determined by the cytosolic pH. The encoded proteins belong to the class-V family of pyridoxal phosphate-dependent aminotransferases. Alternatively spliced transcript variants have been described.

**Immunogen:** Fusion protein of human NFS1

**Applications:** ELISA, IHC

**Recommended Dilutions:** IHC: 50-200; ELISA: 5000-10000

**Host Species:** Rabbit

**Clonality:** Rabbit Polyclonal

**Isotype:** Immunogen-specific rabbit IgG

**Purification:** Antigen affinity purification

**Species Reactivity:** Human

**Constituents:** PBS (without Mg<sup>2+</sup> and Ca<sup>2+</sup>), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

**Research Areas:** Metabolism

**Storage & Shipping:** Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human liver cancer tissue using 219241(NFS1 Antibody) at a dilution of 1/50(Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human liver cancer tissue is first treated with the fusion protein and then with 219241(Anti-NFS1 Antibody) at dilution 1/50.

The image on the left is immunohistochemistry of paraffin-embedded Human colorectal cancer tissue using 219241(Anti-NFS1 Antibody) at a dilution of 1/50.

In comparison with the IHC on the left, the same paraffin-embedded Human colorectal cancer tissue is first treated with fusion protein and then with D226116(Anti-NFS1 Antibody) at dilution 1/50.
