

## SNAI1 RABBIT PAB

**Cat.#:** N225404

**Product Name:** Anti-SNAI1 Rabbit pAb

**Synonyms:** SNAH; Zinc finger protein SNAI1; Protein snail homolog 1; Protein sna

**UNIPROT ID:** O95863

**Background:** Snail is a zinc-finger transcription factor that can repress E-cadherin transcription. Downregulation of E-cadherin is associated with epithelial-mesenchymal transition during embryonic development, a process also exploited by invasive cancer cells. Indeed, loss of E-cadherin expression is correlated with the invasive properties of some tumors and there is a considerable inverse correlation between Snail and E-cadherin mRNA levels in epithelial tumor cell lines. In addition, Snail blocks the cell cycle and confers resistance to cell death. Phosphorylation of Snail by GSK-3 and PAK1 regulates its stability, cellular localization and function. Tissue specificity: Expressed in a variety of tissues with the highest expression in kidney.

**Immunogen:** The antiserum was produced against synthesized peptide derived from human SNAI1. AA range:215-264
