Product Name: Anti-VAR1 Rabbit Polyclonal Antibody

Synonyms: G7A; VAR5; VAR2; NDMSCA

UNIPROT ID: P26640 (Gene Accession - BC012808)

Background: Aminoacyl-tRNA synthetases catalyze the aminoacylation of tRNA by their cognate amino acid. Because of their central role in linking amino acids with nucleotide triplets contained in tRNAs, aminoacyl-tRNA synthetases are thought to be among the first proteins that appeared in evolution. The protein encoded by this gene belongs to class-I aminoacyl-tRNA synthetase family and is located in the class III region of the major histocompatibility complex.
