

## VPS35 RABBIT PAB

**Cat.#:** S221567

**Product Name:** Anti-VPS35 Rabbit Polyclonal Antibody

**Synonyms:** MEM3; PARK17

**UNIPROT ID:** Q96QK1 (Gene Accession - NP\_060676 )

**Background:** This gene belongs to a group of vacuolar protein sorting (VPS) genes. The encoded protein is a component of a large multimeric complex termed the retromer complex involved in retrograde transport of proteins from endosomes to the trans-Golgi network. The close structural similarity between the yeast and human proteins that make up this complex suggests a similarity in function. Expression studies in yeast and mammalian cells indicate that this protein interacts directly with VPS35, which serves as the core of the retromer complex.
