

ARL1 MAB

Arll Monoclonal Antibody

Cat. #: 26056

Gene Symbol: ARL1

Description: Anti-Arll-Mouse Monoclonal Antibody

Background: Arll (Arf-like 1) localizes to the Golgi complex, where it is believed to recruit effector proteins to the trans-Golgi network. Golgi-localized proteins golgin-97 and golgin-245 have been shown as Arll effectors. Additional Arll effectors include the GARP (Golgi-associated retrograde protein)/VFT (Vps53) vesicle-tethering complex and Arfaptin 2. In Drosophila zygotes, mutation of Arll is lethal.
