

ARL1(Q71L) PROTEIN

Arl1(Q71L) Protein

Cat. #: 10156

Product Name: Arl1 Protein Q71L mutant

Synonyms: ADP-ribosylation factor-like 1, ARFL1

Source: Human, recombinant full length, His6-tag

Expression Host Species: E. coli

Molecular Weight: 20 kDa

Purity: >95% by SDS-PAGE

Introduction: Arl1 is a member of the Arf family of regulatory GTPases, within the Ras superfamily of GTPases (ARFs). ARFs, described as activators of cholera toxin (CT) ADP-ribosyltransferase activity, regulate intracellular vesicular membrane trafficking, and stimulate a phospholipase D (PLD) isoform.

Amino Acid Sequence (1-181, Q71L)

Properties

Physical Appearance (form): Dissolved in 20mM Tris-HCl, pH8.0, 150mM NaCl.

Physical Appearance (form): White or clear

Concentration: 1 mg/mL

Storage: -80°C

Preparation Instructions:

Centrifuge the vial before open the cap and reconstitute in water. Adding of 10 mM β -mercaptoethanol or 1 mM DTT into the solution to protect the protein is recommended and using of non-ionic detergents such as n-Dodecyl β -D-maltoside (DoDM) or polyethylene detergents (e.g. C12E10) also help to stabilize the protein. Avoid repeated freezing and thawing after reconstitution. The purity of His-tagged Arl1 Q71L was determined by SDS-PAGE and Coomassie Brilliant Blue Staining
