目录: 28376

产品名称: Biotinylated 41BB(DM67) Rabbit Monoclonal Antibody

基因符号: TNFRSF9; 4-1BB; CD137; CDw137; ILA

描述: Biotinylated 41BB antibody(DM67) Rabbit Monoclonal Antibody

背景: The protein encoded by this gene is a member of the TNF-receptor superfamily. This receptor contributes to the clonal expansion; survival; and development of T cells. It can also induce proliferation in peripheral monocytes; enhance T cell apoptosis induced by TCR:CD3 triggered activation; and regulate CD28 co-stimulation to promote Th1 cell responses. The expression of this receptor is induced by lymphocyte activation. TRAF adaptor proteins have been shown to bind to this receptor and transduce the signals leading to activation of NF-kappaB.
