目录: 28433

产品名称: Biotinylated DNAM1(DM95) Rabbit Monoclonal Antibody

基因符号: DNAM1; CD226; PTA1

描述: Biotinylated DNAM1 antibody(DM95) Rabbit Monoclonal Antibody

背景: This gene encodes a glycoprotein expressed on the surface of NK cells; platelets; monocytes and a subset of T cells. It is a member of the Ig-superfamily containing 2 Ig-like domains of the V-set. The protein mediates cellular adhesion of platelets and megakaryocytic cells to vascular endothelial cells. The protein also plays a role in megakaryocytic cell maturation. Alternative splicing results in multiple transcript variants.
