

HUMAN CLDN5 FULL LENGTH PROTEIN

目录: 11060

产品名称: Human CLDN5 Full Length Protein

规格: 10 µg, 50 µg and 100 µg

基因符号: AWAL; BEC1; CPETRL1; TMDVCF; TMVCF

Target: CLDN5

UNIPROT ID: O00501

描述: Human CLDN5 full length protein-synthetic nanodisc

背景: This protein is a member of the claudin family. Claudins are integral membrane proteins and components of tight junction strands. Tight junction strands serve as a physical barrier to prevent solutes and water from passing freely through the paracellular space between epithelial or endothelial cell sheets. Mutations in this gene have been found in patients with velocardiofacial syndrome.

Species/Host: HEK293

Molecular Weight: The human full length CLDN5 protein has a MW of 23.1 kDa

Formulation & Reconstitution: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization.

储存和运输: Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.

ELISA assay to evaluate CLDN5-Nanodisc
0.2µg Human CLDN5-Nanodisc per well

Figure1. Elisa plates were pre-coated with Flag Tag CLDN5-Nanodisc (0.2 µg/per well). Serial diluted Flag monoclonal antibody solutions were added, washed, and incubated with secondary antibody before Elisa reading. From above data, the EC50 for Flag monoclonal antibody binding with CLDN5-Nanodisc is 7.814ng/ml.
