

EGFR(S768I)

EGFR(S768I)

Cat. #: 26483

Gene Symbol: EGFR/HER1/ERBB1

Description: Anti-EGFR(S768I) Mouse Monoclonal Antibody

Background: EGFR is a receptor tyrosine kinase binding ligands of the EGF family and activating several signaling cascades to convert extracellular cues into appropriate cellular responses. It activates at least 4 major downstream signaling cascades including the RAS-RAF-MEK-ERK, PI3 kinase-AKT, PLCgamma-PKC and STATs modules. Defects in EGFR are associated with lung cancer (LNCR).

Immunogen: A synthetic peptide from the internal region of EGFR which includes the mutation of S768I, human origin.

Applications: ELISA, WB, IF, IHC

Recommended Dilutions:

ELISA: 1:1000-1:5000

WB: 1:1000-1:5000

IHC: 1:50-1:200

Concentration: 1 mg/ml

Host Species: Mouse

Format: Liquid

Clonality: Monoclonal

Isotype:

Purity: Purified from ascites

Preservative: No

Constituents: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 50% glycerol

Species Reactivity: Recognizes EGFR (S768I), but not wild type EGFR from vertebrates.

Storage Conditions: Store at -20°C. Avoid repeated freezing and thawing

Western blot:

Western blot:

Western blot analysis of recombinant EGFR (S768I) and wild type proteins.

Purified His-tagged EGFR (S768I) protein (lane 1) and corresponding wild type protein (amino acids 702–987, lane 2) were blotted with anti EGFR(S768I) mouse monoclonal antibody (Cat. #26483).

Immunofluorescence:

Immunofluorescence:

Immunofluorescence of cells expressing EGFR proteins with anti EGFR(S768I) antibody.

HEK293T cells were transfected with pCDNA3-GFP-EGFR (WT) plasmid (left column) or pCDNA3-GFP EGFR(S768I) plasmid (right column), then fixed and stained with anti- EGFR (S768I) monoclonal antibody (Cat. #26483).

Product Description

Pioneering GTPase and Oncogene Product Development since 2010
