

ANTI GLUK2 NANOBODY**Anti GluK2 Nanobody**

货号: 26204

规格: 100 µL

基因符号: GluK2

描述: Anti GluK2 Nanobody

背景: GluK2 (Glutamate receptor ionotropic, kainate 2) is an ion channel receptor that mediates the signaling of the excitatory neurotransmitter glutamate and is distributed throughout the nervous system, including hippocampus, cortex, amygdala, striatum, hypothalamus, cerebellum, spinal cord, and basal ganglia. At these sites they participate in synaptic transmission and plasticity. At the same time, Gluk2 is also the first receptor discovered that can sense cold signals, which is of great significance.

免疫原: Recombinant monoclonal Nanobody, fused to Human Fc

经过测试的应用: Flow cytometry staining, immunostaining and Elisa, IP, Co-IP, IHC

Dilution: 1:1000

Molecular Weight: 90kD

种属反应性: Human

形式: Liquid

克隆性: Monoclonal

Tag: His

纯化:: Purified from ascites

Preservative: No

成分: PBS, 40% Glycerol, 0.03% proclin300

Species: Human

储存条件:: Store at 4℃, 6 months; -20℃, 2 years

FACS Gluk2 antibody at 1/1000 dilution :
