

GPR77 (DMC482) IGG1 CHIMERIC MAB

目录: 28258

产品名称: GPR77(DMC482) IgG1 Chimeric Monoclonal Antibody

基因符号: C5L2; GPF77; GPR77

描述: GPR77 antibody(DMC482) IgG1 Chimeric Monoclonal Antibody

背景: This gene encodes a G-protein coupled receptor 1 family member involved in the complement system of the innate immune response. Unlike classical G-protein coupled receptors; the encoded protein does not associate with intracellular G-proteins. It may instead modulate signal transduction through the beta-arrestin pathway; and may alternatively act as a decoy receptor. This gene may be involved in coronary artery disease and in the pathogenesis of sepsis. Alternative splicing results in multiple transcript variants. [provided by RefSeq; Nov 2012]
