

ANTI-HPV16 NANOBODY**HPV16 Nanobody**

货号: 26301

规格: 100 µL

基因符号: HPV 16 L1

描述: HPV16 Nanobody

背景: The major capsid protein of human papillomavirus type 16 (HPV16 L1) is a key structural component of viral particles and is of great significance for studying the infection mechanism, diagnosis and vaccine development of HPV16. In the fields of molecular biology, immunology and related disease research, the identification and detection of HPV16 L1 is extremely critical. HPV16 nanobody is a recombinant single domain antibody against HPV16 L1. It has high specificity and affinity and can efficiently recognize and isolate HPV16 L1 protein. It is of great significance in the detection of HPV16 and related research.

免疫原: Recombinant monoclonal Nanobody

经过测试的应用: Flow cytometry staining, immunostaining and Elisa, IP, Co-IP, IHC

Dilution: 1:1000

Molecular Weight: 15kD

种属反应性: Human

形式: Liquid

克隆性: Monoclonal

Tag: His, Myc

成分: PBS, 40% Glycerol, 0.03% proclin300

种属反应性: Human

储存条件: Store at 4℃, 6 months; -20℃, 2 years
