

**HUMAN ADAM9 PROTEIN, HIS TAG**

目录: 11663

产品名称: Human ADAM9 Protein

规格: 10 µg, 50 µg and 100 µg

基因符号: CORD9;MCMP;MDC9;Mltng

**Target:** ADAM9

**UNIPROT ID:** Q13443

**描述:** Recombinant human ADAM9 Protein with C-terminal 6xHis tag

**背景:** This gene encodes a member of the ADAM (a disintegrin and metalloprotease domain) family. Members of this family are membrane-anchored proteins structurally related to snake venom disintegrins, and have been implicated in a variety of biological processes involving cell-cell and cell-matrix interactions, including fertilization, muscle development, and neurogenesis. The protein encoded by this gene interacts with SH3 domain-containing proteins, binds mitotic arrest deficient 2 beta protein, and is also involved in TPA-induced ectodomain shedding of membrane-anchored heparin-binding EGF-like growth factor. Several alternatively spliced transcript variants have been identified for this gene. [provided by RefSeq, Jul 2010]

**Species/Host:** HEK293

**Molecular Weight:** The protein has a predicted molecular mass of 74.8 kDa after removal of the signal peptide.

**Molecular Characterization:** ADAM9(Ala29-Asp697) 6×His Tag

**纯化:** The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.

**Formulation & Reconstitution:** Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization.

**储存和运输:** Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
