

HUMAN BTN2A1 PROTEIN, HIS TAG

Cat.#: 11868

Product Name: Human BTN2A1 Protein

Size: 10 µg, 50 µg and 100 µg

Synonyms: BK14H9.1;BT2.1;BTF1;BTN2.1;DJ3E1.1

Target: BTN2A1

UNIPROT ID: Q7KYR7

Description: Recombinant Human BTN2A1 Protein with C-terminal 6xHis tag

Background: This gene encodes a member of the immunoglobulin superfamily. The gene is located in a cluster of butyrophilin-like genes in the juxta-telomeric region of the major histocompatibility complex on chromosome 6. A pseudogene of this gene has been identified in this cluster. The encoded protein is an integral plasma membrane protein involved in lipid, fatty-acid, and sterol metabolism. Alterations in this gene may be associated with several disease states including metabolic syndrome. Multiple alternatively spliced transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Jul 2013]

Species/Host: HEK293

Molecular Weight: The protein has a predicted molecular mass of 25.4 kDa after removal of the signal peptide. The apparent molecular mass of BTN2A1-His is approximately 35-55 kDa due to glycosylation.

Molecular Characterization: BTN2A1(Gln29-Ala248) 6xHis tag

Purity: The purity of the protein is greater than 85% as determined by SDS-PAGE and Coomassie blue staining.

Formulation & Reconstitution: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization.

Storage & Shipping: Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
