

HUMAN CLEC4A PROTEIN, HFC TAG

目录: 11919

产品名称: Human CLEC4A Protein

规格: 10 µg, 50 µg and 100 µg

基因符号: CD367;CLECSF6;DCIR;DDB27;HDCGC13P;hDCIR;LLIR

Target: CLEC4A

UNIPROT ID: Q9UMR7

描述: Recombinant Human CLEC4A Protein with N-terminal human Fc tag

背景: This gene encodes a member of the C-type lectin/C-type lectin-like domain (CTL/CTLD) superfamily. Members of this family share a common protein fold and have diverse functions, such as cell adhesion, cell-cell signalling, glycoprotein turnover, and roles in inflammation and immune response. The encoded type 2 transmembrane protein may play a role in inflammatory and immune response. Multiple transcript variants encoding distinct isoforms have been identified for this gene. This gene is closely linked to other CTL/CTLD superfamily members on chromosome 12p13 in the natural killer gene complex region. [provided by RefSeq, Jul 2008]

Species/Host: HEK293

Molecular Weight: The protein has a predicted molecular mass of 46.0 kDa after removal of the signal peptide. The apparent molecular mass of hFc-CLEC4A is approximately 55–70 kDa due to glycosylation.

Molecular Characterization: hFc(Glu99-Ala330) CLEC4A(Gln70-Leu237)

纯化:: The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.

Formulation & Reconstitution: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization.

储存和运输: Store at –20°C to –80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at –80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
