

## HUMAN ITGB1 PROTEIN, HFC TAG

**Cat.#:** 11258

**Product Name:** Human ITGB1 Protein

**Size:** 10 µg, 50 µg and 100 µg

**Synonyms:** GPIIA;CD29;VLA-4 subunit beta

**Target:** ITGB1

**UNIPROT ID:** P05556

**Description:** Recombinant human ITGB1 protein with C-terminal human Fc tag

**Background:** Integrins are heterodimeric proteins made up of alpha and beta subunits. At least 18 alpha and 8 beta subunits have been described in mammals. Integrin family members are membrane receptors involved in cell adhesion and recognition in a variety of processes including embryogenesis, hemostasis, tissue repair, immune response and metastatic diffusion of tumor cells. This gene encodes a beta subunit. Multiple alternatively spliced transcript variants which encode different protein isoforms have been found for this gene. [provided by RefSeq, Jul 2008]

**Species/Host:** HEK293

**Molecular Weight:** The protein has a predicted molecular mass of 104.5 kDa after removal of the signal peptide. The apparent molecular mass of ITGB1-hFc is approximately 130-250 kDa due to glycosylation.

**Molecular Characterization:** ITGB1(Gln21-Asp728) hFc(Glu99-Ala330)

**Purity:** The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.

**Formulation & Reconstitution:** Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization.

**Storage & Shipping:** Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
