

HUMAN SERPINF2 PROTEIN, HIS TAG**Cat.#:** 11858**Product Name:** Human SERPINF2 Protein**Size:** 10 µg, 50 µg and 100 µg**Synonyms:** A2AP;AAP;ALPHA-2-PI;alpha2AP;API;PII**Target:** SERPINF2**UNIPROT ID:** P08697**Description:** Recombinant Human SERPINF2 Protein with C-terminal 6xHis tag**Background:** This gene encodes a member of the serpin family of serine protease inhibitors. The protein is a major inhibitor of plasmin, which degrades fibrin and various other proteins. Consequently, the proper function of this gene has a major role in regulating the blood clotting pathway. Mutations in this gene result in alpha-2-plasmin inhibitor deficiency, which is characterized by severe hemorrhagic diathesis. Multiple transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Sep 2009]**Species/Host:** HEK293**Molecular Weight:** The protein has a predicted molecular mass of 52.5 kDa after removal of the signal peptide. The apparent molecular mass of SERPINF2-His is approximately 55–70 kDa due to glycosylation.**Molecular Characterization:** SERPINF2(Met28-Lys491) 6×His tag**Purity:** The purity of the protein is greater than 85% as determined by SDS-PAGE and Coomassie blue staining.**Formulation & Reconstitution:** Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization.**Storage & Shipping:** Store at –20°C to –80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at –80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
