## IL2RA (DM148) RABBIT MAB

目录: 28492

产品名称: IL2RA(DM148) Rabbit Monoclonal Antibody

基因符号: IL2RA;CD25;p55;IL2-RA;IL-2-RA

描述: IL2RA antibody(DM148) Rabbit Monoclonal Antibody

背景: The interleukin 2 (IL2) receptor alpha (IL2RA) and beta (IL2RB) chains; together with the common gamma chain (IL2RG); constitute the high-affinity IL2 receptor. Homodimeric alpha chains (IL2RA) result in low-affinity receptor; while homodimeric beta (IL2RB) chains produce a medium-affinity receptor. Normally an integral-membrane protein; soluble IL2RA has been isolated and determined to result from extracellular proteolyisis. Alternately-spliced IL2RA mRNAs have been isolated; but the significance of each is presently unknown. Mutations in this gene are associated with interleukin 2 receptor alpha deficiency.
