

## MOUSE B7-H3 PROTEIN, HFC TAG

**Cat.#:** 12132

**Product Name:** Mouse B7-H3 Protein

**Size:** 10 µg, 50 µg and 100 µg

**Synonyms:** 6030411F23Rik;AU016588;B7h3;B7RP-2

**Target:** B7-H3

**UNIPROT ID:** Q8VE98

**Description:** Recombinant mouse B7-H3 protein with C-terminal human Fc tag

**Background:** Modulates T-cell-mediated immune responses and the development of acute and chronic transplant rejection. Plays a positive regulatory role in bone formation and has a dual role in the bone-immune interface. Induces antitumor immunity as it activates both acquired and innate immunity leading to natural killer cell and CD8 T-cell dependent killing of tumor cells.[UniProtKB/Swiss-Prot Function]

**Species/Host:** HEK293

**Molecular Weight:** The protein has a predicted molecular mass of 28.7 kDa after removal of the signal peptide. The apparent molecular mass of mB7-H3-hFc is approximately 55-70 kDa due to glycosylation.

**Molecular Characterization:** Mouse B7-H3(Val29-Phe244) hFc(Glu99-Ala330)

**Purity:** The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.

**Formulation & Reconstitution:** Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization.

**Storage & Shipping:** Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
