

Product Description

RAN PROTEIN

Ran Protein

货号: 10112

产品名称: Ran Protein

基因符号: Ras-related nuclear protein, TC4, Gsp1, ARA24

Source: Human, recombinant full length, His6-tag

Expression 种属反应性: E. coli

Molecular Weight: 24 kDa

纯化: >95% by SDS-PAGE

Introduction: Ran is a member of the Ras-superfamily GTPases. Ran is involved in control of DNA synthesis and of cell cycle progression, and the transport of proteins across the nuclear envelope, as well as in microtubule organization during mitosis.

Amino Acid Sequence (1-216)

Properties

Physical Appearance (form): Dissolved in 20mM Tris-HCl, pH8.0, 150mM NaCl.

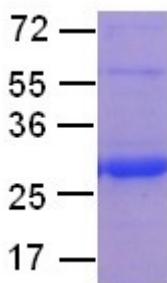

Physical Appearance (form): White or clear

浓度: 1 mg/mL

Storage: -80°C

Preparation Instructions:

Centrifuge the vial before open the cap and reconstitute in water. Adding of 10 mM β -mercaptoethanol or 1 mM DTT into the solution to protect the protein is recommended and using of non-ionic detergents such as n-Dodecyl β -D-maltoside (DoDM) or polyethylene detergents (e.g. C12E10) also help to stabilize the protein. Avoid repeated freezing and thawing after reconstitution. The purity of His-tagged Ran was determined by SDS-PAGE and Coomassie Brilliant Blue Staining.
