

Fascin-N

Catalog Number: 26012

Gene Symbol: FSCN1

Description: Anti-Fascin Mouse Monoclonal Antibody

Background: Fascin is an ~58 kDa monomeric actin filament bundling protein. It is required to maximally cross-link the actin filaments into straight, compact, and rigid bundles, and contributes to the formation of filopodia that are critical for cell migration. Elevated levels of fascin have been found in metastatic tumors and are correlated with clinically aggressive phenotypes, poor prognosis, and shorter survival.
