

Ric-8A

Catalog Number: 26071

Gene Symbol: RIC8A

Description: Anti-Ric-8A Mouse Monoclonal Antibody

Background: Ric-8A (Resistance to Inhibitors of Cholinesterase-8A) interacts with G α o, G α i, G α q and G α 13, but not G α s, proteins. Mammalian Ric-8A protein is a guanine nucleotide exchange factor for G α q, G α i, G α o, G α 12, G α 13, but not for G α s. *C. elegans* Ric8 (also named Synembryn) is required for proper asymmetric division of 1-cell-stage embryos. Ric8 is required for the generation of substantial pulling forces on astral microtubules.

Immunogen: A synthetic peptide near the C-terminus of Ric-8A, human origin.
